

UID EX 10

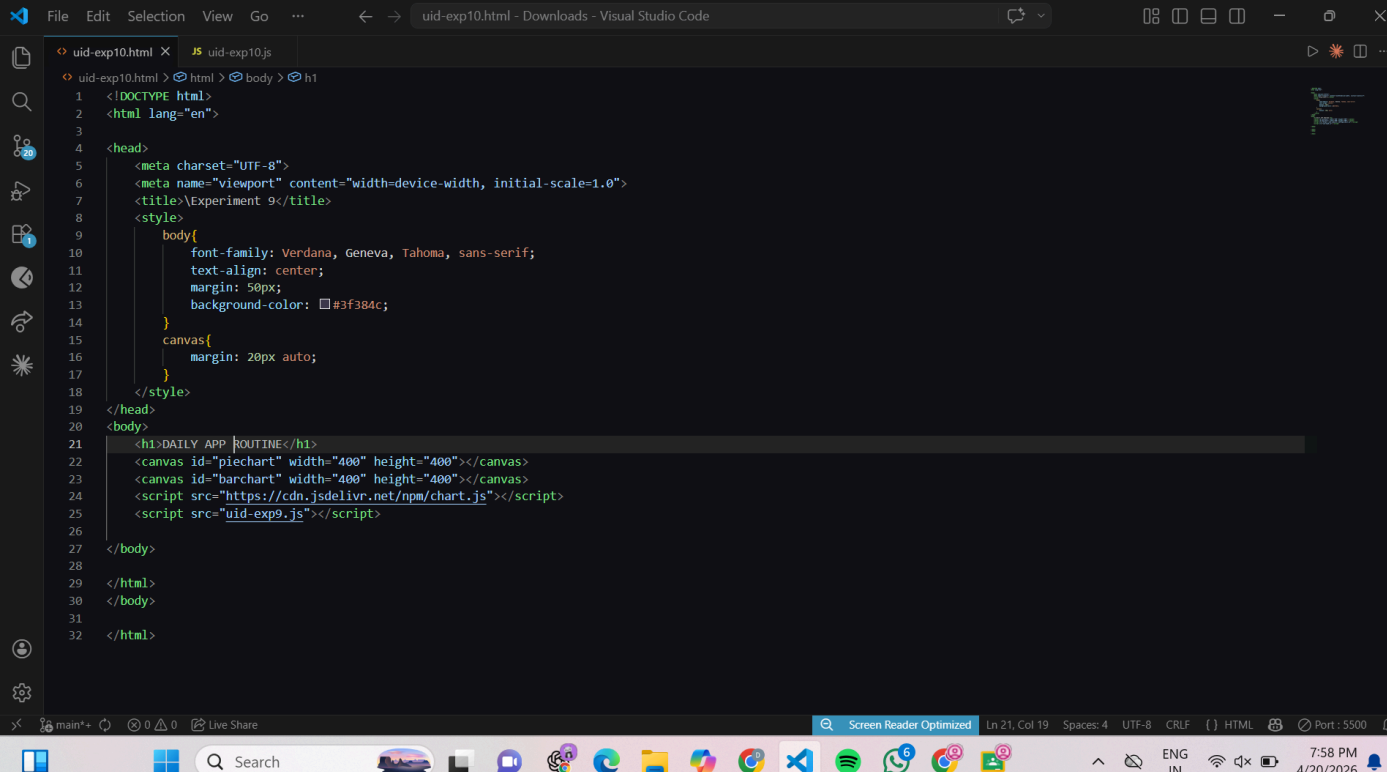

AIM:

The aim is to create data visualizations, such as pie charts and bar graphs, for an inventory management system using JavaScript.

PROCEDURE:

Step 1:

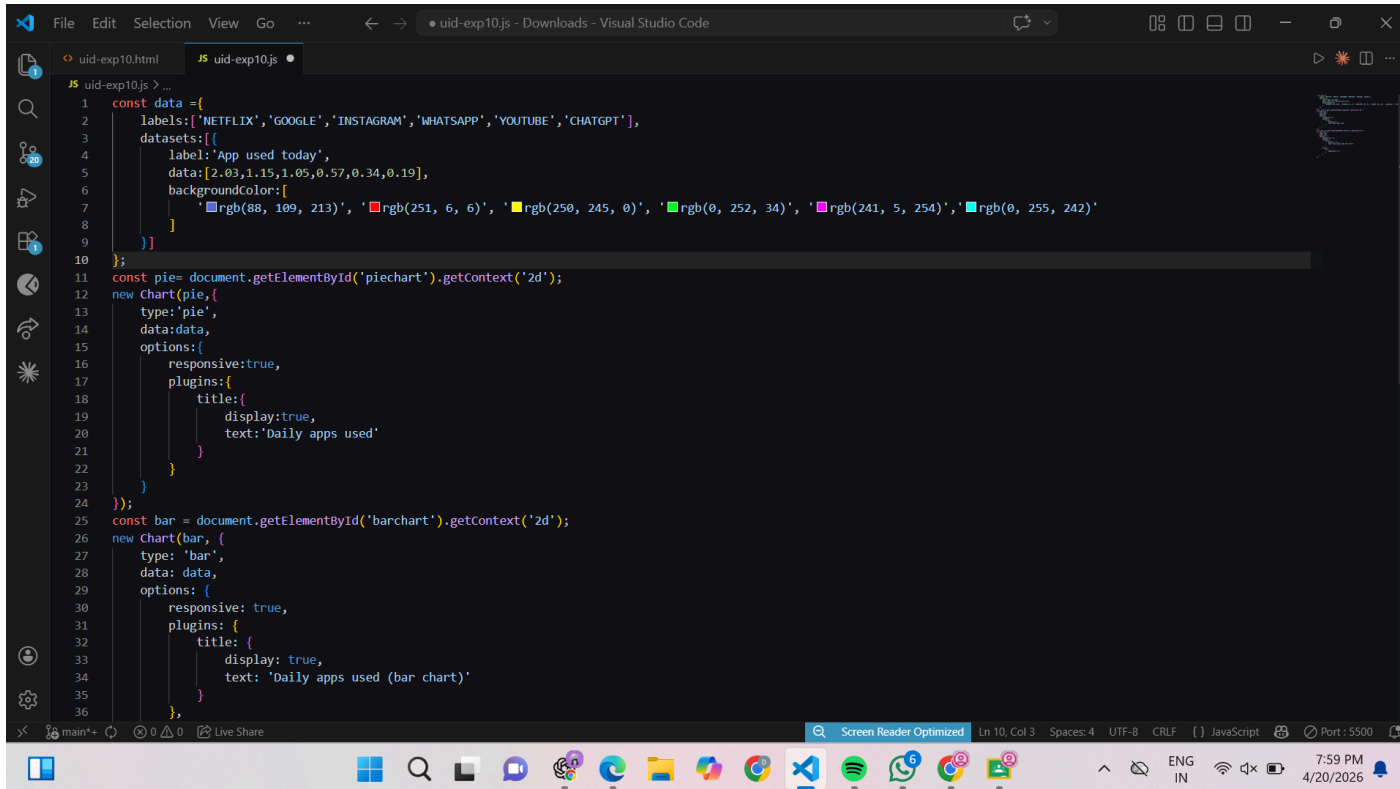

Set Up Your HTML File

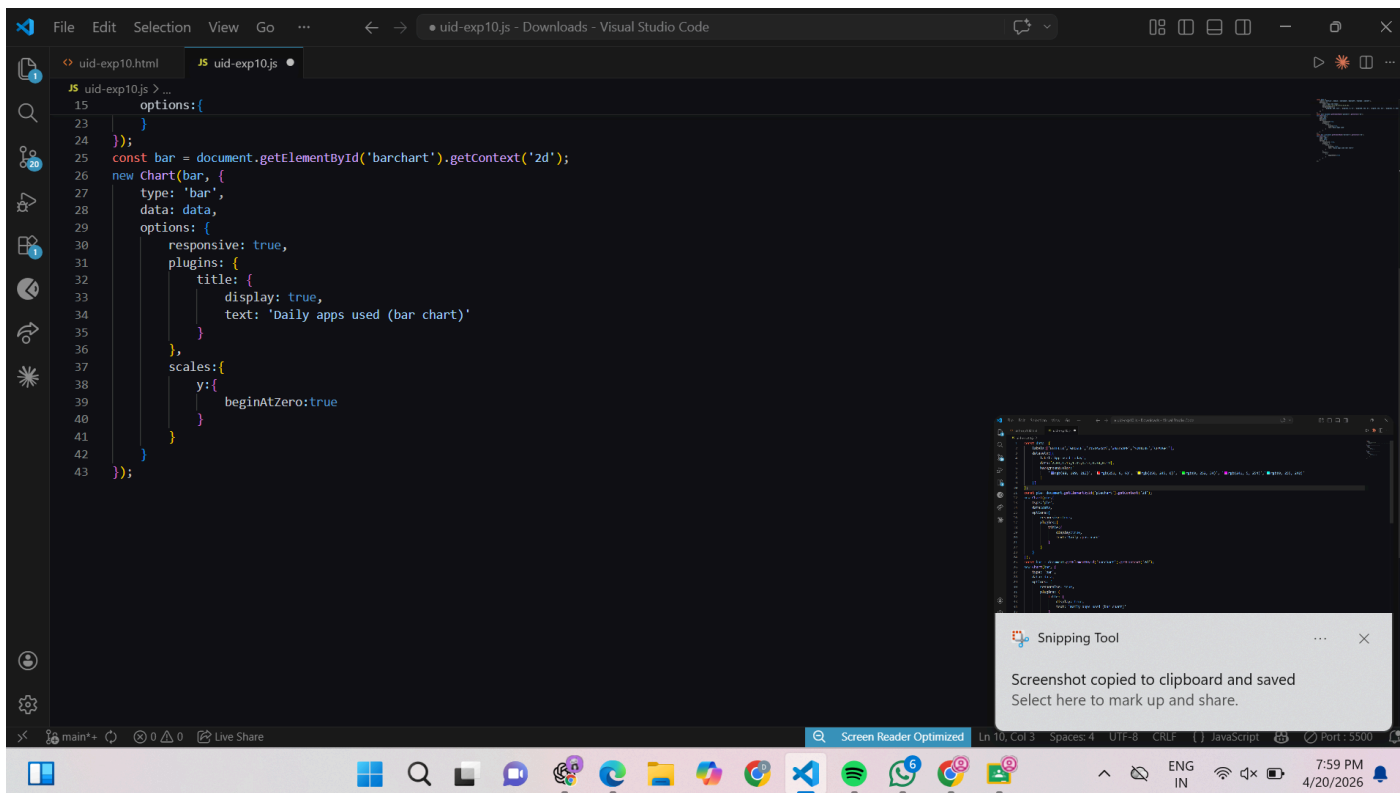

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <title>\Experiment 9</title>
8   <style>
9     body{
10       font-family: Verdana, Geneva, Tahoma, sans-serif;
11       text-align: center;
12       margin: 50px;
13       background-color: #3f384c;
14     }
15     canvas{
16       margin: 20px auto;
17     }
18   </style>
19 </head>
20 <body>
21   <h1>DAILY APP ROUTINE</h1>
22   <canvas id="piechart" width="400" height="400"></canvas>
23   <canvas id="barchart" width="400" height="400"></canvas>
24   <script src="https://cdn.jsdelivr.net/npm/chart.js"></script>
25   <script src="uid-exp9.js"></script>
26
27 </body>
28
29 </html>
30 </body>
31
32 </html>
```

Step 2:

Create the JavaScript File for Charts Next, create a JavaScript file (script.js) to handle the data visualization logic.

```
1  const data = {
2    labels: ['NETFLIX', 'GOOGLE', 'INSTAGRAM', 'WHATSAPP', 'YOUTUBE', 'CHATGPT'],
3    datasets: [
4      {
5        label: 'App used today',
6        data: [2.03, 1.15, 1.05, 0.57, 0.34, 0.19],
7        backgroundColor: [
8          'rgb(88, 189, 213)', 'rgb(251, 6, 6)', 'rgb(250, 245, 0)', 'rgb(0, 252, 34)', 'rgb(241, 5, 254)', 'rgb(0, 255, 242)'
9        ]
10      }
11    ]
12  };
13  const pie = document.getElementById('piechart').getContext('2d');
14  new Chart(pie, {
15    type: 'pie',
16    data: data,
17    options: {
18      responsive: true,
19      plugins: {
20        title: {
21          display: true,
22          text: 'Daily apps used'
23        }
24      }
25    }
26  });
27  const bar = document.getElementById('barchart').getContext('2d');
28  new Chart(bar, {
29    type: 'bar',
30    data: data,
31    options: {
32      responsive: true,
33      plugins: {
34        title: {
35          display: true,
36          text: 'Daily apps used (bar chart)'
37        }
38      }
39    }
40  });
```

```
15  options: {
16  }
17  });
18  const bar = document.getElementById('barchart').getContext('2d');
19  new Chart(bar, {
20    type: 'bar',
21    data: data,
22    options: {
23      responsive: true,
24      plugins: {
25        title: {
26          display: true,
27          text: 'Daily apps used (bar chart)'
28        }
29      },
30      scales: {
31        y: {
32          beginAtZero: true
33        }
34      }
35    }
36  });
```

OUTPUT:
